

# Sunrise School

## NURTURING EACH STUDENT'S UNIQUE POTENTIAL

A comprehensive program offering an alternate functional life skills curriculum tailored to meet the needs of students ages 5 to 21 with moderate to severe global delays associated with autism and developmental disorders.

### FUNCTIONAL ACADEMICS

Academic programs are individualized and include functional reading, writing, math, self-help, vocational and community awareness and safety. Work skills are taught in a vocational lab on campus or in the classroom. Speech & Language and Occupational Therapists work closely with teachers in a collaborative model to support students' learning experiences.

### COMMUNITY

Students of all ages participate in Community Based Instruction that provides them with opportunities to generalize independent living skills taught in the classroom to real-life experiences such as purchasing items, money management, taking public transportation, and practicing communication skills in the community.

### SOCIAL

Social skills instruction is taught and modeled throughout the school day and reinforced through a rich student life that includes art and music programs, recreation club, a community garden, school socials, dances, and holiday celebrations.

At Sunrise School, our multidisciplinary team of professionals provides a comprehensive learning experience that fosters growth in all essential areas. This integrated educational program supports the development of communication, behavior, academics, motor skills, adaptability, independence, and social-emotional well-being. Our goal is to enable each student to reach their full potential by customizing the curriculum to meet their specific learning needs, fostering increased independence. We also prioritize student-centered transition plans with active parental involvement, ensuring a collaborative and tailored approach to their continued development.

Applications are accepted year-round for students ages 5 to 21.
